

## Support for parents

We understand this is a challenging time for parents too, many of whom are now supporting their children's learning at home or may have questions about their children potentially returning to school.

We have developed the following guidance and resources for parents to support them at this time:

- [Q&A](#) which answers key questions parents may have
- [Guidance for parents on phased reopening of education settings](#)
- [Guidance for parents on supporting learning at home](#) for early years and primary age children (secondary school guidance to follow)
- List of [online resources](#) to support children's development

Please do share these with parents if helpful.
